PROFESSIONAL SUMMARY **4**
 As chair of the Department of Orthopaedics, I work to ensure that we provide excellent education to medical students, training them in both basic and advanced imaging modalities. I pursue departmental connections with community resources to further our students' education and coordinate our efforts to help students who have career interests in radiology with residency applications, including making their final selections and being accepted into programs. I have over 25 years' experience serving in the military, active duty and as a reservist, and invite students to talk with me if they have an interest in a medical career in the military. . .
