

Celebrating SU

On January 28, 2005, the Office of Advancement for the School of Medicine and Biomedical Sciences hosted a reception for donors to UB's *Generation to Generation* capital campaign. The event was the finale to the highly successful campaign in which the School of Medicine and Biomedical Sciences realized its goal of \$48 million. At the event, a donor wall was unveiled listing those who made cumulative gifts of \$10,000 or more to the school during the campaign. The wall is located in the atrium of the Biomedical Education Building.
